Building Green

Saving Our World...

Excelling beyond Recycling & Reusing, Parkland Plastics was founded on the principles of Building Green. PLAS-TEX® is our proprietary technology for converting post-industrial scrap into USDA accepted American manufactured goods. It is the first and only plastic extruded sheet made from 100% recycled resins. Every time one of our satisfied customers purchases a piece of Duro-Base, they are saving about 10-lbs. of non-biodegradable plastic from landfills.

Features & Benefits

- **Virtually Indestructible** – Long-lasting protection equals high cost-effectiveness
- **100% Waterproof** – Non-absorbent: no swelling, rotting, or water discoloration
- **Mold and Mildew Resistant** – Does not support fungal or bacterial growth
- **Sanitary & Hygienic** – Does not contribute to "sick"-building syndrome
- **Chemically Inert** – Not affected by acids, chemical solvents or petroleum products
- **Color Goes All the Way Through** – Scratches don't show
Makes for extended product life
- **Class C Flame Spread Rating**

Installation instructions:

- 1) Use circular saw, cut to desired length, join with scarf joint
- 2) Apply Parkland Construction Adhesive to DuroBase back with trowel
- 3) Place flush on floor or plumb across wall bottom
- 4) Reinforce 1/2" & 5/8" DuroBase with screws by pre-drilling holes and counter-sinking into studs

BASE
